How much did the Nifty 50 and BSE Sensex decline on Friday

Chat History

You: How much did the Nifty 50 and BSE Sensex decline on Friday

Bot: The Nifty 50 declined by 1.17 percent, closing at 24,852 points, while the BSE Sensex declined 1.25 percent, finishing at 81,170 points.

You: What caused the Indian stock market to close lower on Friday, breaking its three-week winning streak

Bot: Investors exercised caution ahead of a key US jobs report that could influence the Federal Reserve's decisions on the pace and extent of interest rate cuts.

You: What are the key features of the new iPhone 16

Bot: - Camera control that can pull up information like reviews, the menu, and how to make a reservation when pointed at a restaurant.

- Visual intelligence that can identify things like dog breeds or landmarks and add things to your calendar.
- Integration with ChatGPT to get help with homework or other tasks.
- Customizable Action Button that can be programmed to do anything from translating a phrase on the fly to opening a calendar.

- Physical button for easy access to opening the camera.
- 17% more system memory bandwidth to better support Apple Intelligence.
- Glass-ceramic screen that promises to be 50% tougher and 40% faster GPU than the previous model.
-  • Ability to create your own emojis with text prompts in iMessage.
- Ability to generate non-photorealistic images to send in conversations.
- Option to opt-in to searching ChatGPT instead of Siri when OpenAI's technology is better suited to answer a user's question.
- New privacy updates that let users "lock" certain apps so only they can open them using Face ID, Touch ID, or their passcode.
- Ability to "hide" apps so they don't show up on the home screen and no media from those apps appear elsewhere across the system.
- Real-time call transcripts that can be recorded and created right from the phone app.
- Upgraded processor to better handle a lot of these features without compromising battery life.
- Subtle changes to the appearance of the iPhone, such as a wider screen or updated edges.

You: How much does the newest iPhone 16 Pro Max cost?

Bot: \$1,199

You: Who are the key domestic investors holding a stake in NSE

Bot: - Life Insurance Corporation - State Bank of India - India Infoline Limited - Stock Holding Corporation of India Limited

You: What is the NSE and what is its history

Bot: The National Stock Exchange of India Limited (NSE) is one of the leading stock exchanges in India, based in Mumbai. It is the world's largest derivatives exchange by number of contracts traded and the third largest in cash equities by number of trades for the calendar year 2022. It is the 8th largest stock exchange in the world by total market capitalization, exceeding \$5 trillion on May 23, 2024.

NSE was incorporated in the year 1993 to bring about transparency in the Indian equity markets. It was set up at the behest of the Government of India, based on the recommendations laid out by the Pherwani committee in 1991 and the blueprint was prepared by a team of five members (Ravi Narain, Raghavan Puthran, K Kumar, Chitra Sankaran and Ashishkumar Chauhan) along with R H Patil and SS Nadkarni who were deputed by IDBI in 1992. Instead of

trading memberships being confined to a group of brokers, NSE ensured that anyone who was qualified, experienced, and met the minimum financial requirements was allowed to trade.

NSE commenced operations on 30 June 1993 starting with the wholesale debt market (WDM) segment and equities segment on 3 November 1994. It was the first exchange in India to introduce an electronic trading facility. Within one year of the start of its operations, the daily turnover on NSE exceeded that of the BSE.

Operations in the derivatives segment commenced on 12 June 2000. In August 2008, NSE introduced currency derivatives.
